

# Webinar series Commercial stability in a world of conflict: Effective dispute management in uncertain times

## Overview:

The fall-out of armed and economic conflict, including the huge volume of commercial disputes triggered and/or caused by the conflict is overwhelming. This series will take a considered, clear-eyed look at the types of disputes, sectors and industries affected. Those attending will benefit from real-life examples of how to deal with economic disruption in times of geo-political uncertainty: contract disruption, supply chain disruption, raw material shortage, lack or over-supply of goods, human and capital displacement. It will provide a forum for discussion of market needs for information, education, and framing, and what the community of dispute resolvers can contribute to maintain and strengthen the system that underpins all international commerce, the rule of law.

## Series:

### **1. Acute dispute and underlying conflict - 6 April 2022, 1pm London (GMT+1)**

Introducing a simple structure of questions to analyse situations as they arise at the macro and micro level (what, where, who, why, when), this first session will look at how we respond as neutrals, representatives, and commercial parties to the different types of disputes currently arising and those anticipated in the near future.

### **2. Civil-commercial Neutrals and the fall-out of conflict - 4 May 2022, 1pm London (GMT+1)**

What practical advice can experienced dispute resolvers offer in the current circumstances?

### **3. Commercial organisations and political conflict - 15 June 2022, 1pm London (GMT+1)**

What practical advice can experienced dispute resolvers offer commercial organisations in navigating the inevitable conflict and disputes arising out of the current situation?

### **4. Civil-commercial and International Law - 13 July 2022, 1pm London (GMT+1)**

What practical advice can experienced dispute resolvers offer on the changing face of international commercial law and dispute resolution practice coming out of the current situation?
